INDEX TO VOLUME III

Authors

- Allardyce, J.**—The determination of cholesterol in blood, 115.
- Allardyce, J., Fleming, R. H., Fowler, F. L. and Clark, R. H.**—Blood normals for cattle; some pathological values, 120.
- Alty, S.**—See Alty, T.
- Alty, T. and Alty, S.**—The detection of rock salt by the methods of electrical surveying, 521.
- Anderson, C. G.**—See Hibbert, H.
- Andrus, P. M.**—The physical characters of penumbral shadows and their significance in roentgenography, 252.
- Ashton, M. R.**—See Hutchinson, A. H.
- Bain, A. M.**—See MacKay, H. M.
- Barnes, W. H. and Maass, O.**—A new adiabatic calorimeter, 70.
Specific heats and latent heat of fusion of ice, 205.
- Boyle, R. W. and Lehmann, J. F.**—Diffractive reflection and scattering of ultrasonic waves. Their influence on torsion-pendulum measurements of sound intensity, 491.
- Burton, A. C.**—See McLennan, J. C.
- Clark, R. H.**—See Allardyce, J. and Fleming, R. H.
- Coffin, C. C. and Maass, O.**—Molecular attractive forces and the velocity of chemical reactions, 526.
Note on the effect of intensive drying on the velocity of gaseous reactions, 540.
- Cook, W. H.**—See Newton, R.
- Farrell, L.**—See Lochhead, A. G.
- Field, Geo. S.**—The effect of combined A.C. and D.C. plate supply on a short wave triode oscillator, 287.
The influence of certain factors on the output of a triode oscillator, 510.
Methods of making Lecher-wire measurements, 516.
- Fleming, R. H.**—See Allardyce, J.
- Fleming, R. H., Fowler, F. L. and Clark, R. H.**—Haematuria vesicalis, 125.
- Fowler, F. L.**—See Allardyce, J. and Fleming, R. H.
- Fowler, N. M.**—See Savage, A.
- Fryer, J. R.**—Cytological studies in *Medicago*, *Melilotus* and *Trigonella*, 3.
- Geddes, W. F. and Winkler, C. A.**—A study of the relative value of honey and sucrose in bread manufacture, 543.
- Gibbs, R. D.**—See Scarth, G. W.
- Glass, J. V. S.**—See McLennan, J. C.
- Green, J. J.**—See Klein, G. J.
- Harrison, F. C., Tarr, H. L. A. and Hibbert, H.**—Studies on reactions relating to carbohydrates and polysaccharides. XXXIII. The synthesis of polysaccharides by bacteria and enzymes, 449.
- Hatcher, W. H. and Mueller, W. H.**—The oxidation of some dibasic acids, 291.
- Hatcher, W. H. and Sturrock, M. G.**—The influence of hydrogen ions on the Fenton reaction, 214.
- Hibbert, H. and Anderson, C. G.**—Studies on reactions relating to carbohydrates and polysaccharides. XXXII. The constitution of sedosan (anhydro-sedoheptose), 306.
- Hibbert, H. and Marion, L.**—Studies on lignin and related compounds. IV. The nitration of glycol-lignin, 130.
- Hibbert, H. and Phillips, J. B.**—Studies on lignin and related compounds. III. Glycerol-chlorohydrin-lignin, 65.

- Hibbert, H.—See Harrison, F. C.
- Hutchinson, A. H. and Ashton, M. R.—The effect of radiant energy on growth and sporulation in *Colletotrichum phomoides*, 187.
- Irwin, M. L.—See Sadler, W.
- Jamieson, M. C.—See Savage, A.
- Johnston, H. W. and Maass, O.—Penetration studies. The path of liquid penetration in jack pine, 140.
- Klein, G. J., Tupper, K. F. and Green, J. J.—The design of corners in fluid channels, 272.
- Klugh, A. B.—The effect of the ultra-violet component of sunlight on certain aquatic organisms, 104.
- Lehmann, J. F.—See Boyle, R. W.
- Lochhead, A. G. and Farrell, L.—The effect of preservatives on fermentation by sugar-tolerant yeasts from honey, 95.
Soil as a source of infection of honey by sugar-tolerant yeasts, 51.
- Maass, O.—See Barnes, W. H., Coffin, C. C. and Johnston, H. W.
- MacKay, H. M. and Bain, A. M.—Distribution of stress in parallel welding fillets, 260.
- McLennan, J. C. and Burton, A. C.—The heating of electrolytes in high frequency fields, 224.
- McLennan, J. C. and Glass, J. V. S.—Action of high speed electrons on methane, oxygen and carbon monoxide, 241.
- Marion, L.—See Hibbert, H.
- Martin, W. M.—See Newton, R.
- Mueller, W. H.—See Hatcher, W. H.
- Newton, R. and Cook, W. H.—The bound water of wheat-flour suspensions, 560.
- Newton, R. and Martin, W. M.—Physico-chemical studies on the nature of drought resistance in crop plants, 336, 385.
- Peto, F. H.—Cytological studies in the genus *Agropyron*, 428.
- Phillips, J. B.—See Hibbert, H.
- Reilley, H. E.—See Shaw, A. N.
- Rose, D. C.—Energy losses and scattering of electrons in mercury vapor, 174.
- Sadler, W. and Irwin, M. L.—Feed flavor or stable odor in milk caused by an atypical strain of *Aërobacter oxytocum*, 200.
- Savage, A. and Jamieson, M. C.—Note on the combined use of photo-electric cell and projection microscope, 322.
- Savage, A., Williams, W. L. and Fowler, N. M.—A study of the head length variability of equine spermatozoa, 327.
- Scarth, G. W.—Sinkage studies. IV. The mechanism of the absorption of water by wood blocks, 107.
- Scarth, G. W. and Gibbs, R. D.—Sinkage studies. III. Changes in the water-gas system in logs during seasoning and flotation, 80.
- Shaw, A. N. and Reilley, H. E.—The maintenance of a standard of electromotive force: Notes on standard Weston cells, 473.
- Stansfield, E. and Sutherland, J. W.—Determination of carbon and hydrogen, 318.
Oxygen bomb calorimeter, 464.
- Sturrock, M. G.—See Hatcher, W. H.
- Sutherland, J. W.—See Stansfield, E.
- Tarr, H. L. A.—See Harrison, F. C.
- Tupper, K. F.—See Klein, G. J.
- Williams, W. L.—See Savage, A.
- Winkler, C. A.—See Geddes, W. F.

INDEX TO VOLUME III

Subjects

- Absorption and transpiration**, Plant structure and development in relation to, 338.
- Absorption of water**
by logs, 113.
by wood blocks, Factors determining rate of, 107.
- Acervuli** in cultures of *Colletotrichum phomoides*, Effect of irradiation on development of, 191.
- Acids**, The oxidation of some dibasic, (Hatcher and Mueller), 291.
- Adiabatic calorimeter**, A new, (Barnes and Maass), 70.
- Adonite**, Effect of an atypical strain of *Aërobacter oxylocum* on, 203.
- Aegilops ovata**, 442.
cylindrica, 442.
- Aërobacter oxytocum**, Feed flavor or stable odor in milk caused by an atypical strain of, 200.
- Aesculin**, Effect of an atypical strain of *Aërobacter oxylocum* on, 203.
- Aging coefficients** of standard cells, 483.
- Aging equation** for standard cells,
General, 487.
Preliminary determination of, 481.
- Agropyron**, Chromosome numbers in, 441.
Cytological studies in the genus, (Peto), 428.
Morphological variability in, 429.
- Agropyron**,
caninum, 433.
cristatum, 393, 437.
dagnae, 437.
dasystachyum, 429.
desertorum, 437.
elongatum, 439.
glaucum, 441.
griffithsii, 429.
juncum, 429.
litorale, 429.
obtusiusculum, 440.
pungens, 440.
repens, 429.
richardsonii, 429.
sibiricum, 437.
smithii, 393, 429.
smithii molle, 429.
spicatum, 437.
tenerum, 359, 387, 429.
villosum, 439.
- Agrostideae**, 428.
- Alaska wheat**, 386.
- Alberta winter rye**, 359, 387.
- Allomucic acid**, 2:3:4-trimethoxy-5-hydroxy-*d*-, 309.
- Ammonia**, Effect of intensive drying on reaction between hydrogen chloride and, 540.
- Amino-acid nitrogen** in blood of cattle, 121, 123.
- Ammonia and carbon dioxide**, Reaction between, Inhibition of reaction in gaseous state, 541.
Reaction in liquid state, 541.
- Ammonium carbamate**, Reaction of ammonia and carbon dioxide in liquid state to form, 541.
Inhibition of reaction between ammonia and carbon dioxide in gaseous state, 541.
- Analyzer** for velocity analysis of beams of charged particles, 176.
Resolving power of, 177.
- Andropogon scoparius**, 439.
- Andropogoneae**, 428.
- Anguilla rostrata**, 104.
- Angular distribution** of elastically scattered electrons, 183.
of inelastically scattered electrons, 184.
- Anhydro-sedoheptose** (sedosan), Constitution of, (Hibbert and Anderson), 306.
- Aquatic organisms**, Effect of ultra-violet component of sunlight on certain, (Klugh), 104.
- Arabinose**, Effect of an atypical strain of *Aërobacter oxylocum* on, 203.
- Araboglutarate-dimethylamide**,
Trimethoxy-,
Fractionation of, 315.
Preparation of, 315.
- δ -Arabonolactone**, Epimerisation of trimethyl-, 316.
- Arabo-trimethoxy-glutaromethylamide**, 312.
- Aristida pungens**, 343.
- Aristolochia clematitis**, 339.
- Artemisia gnaphalodes**, 395.
- Artesian well water**, Analysis of surface and, 127.
- Aspergillus sydowi**, 451.
- Aster villosa**, 339.
- Astragalus pectinatus**, 395.
- Atriplex confertifolia**, 341.

Atriplex nuttallii, 341, 342.

Avena brevis, 387.

fatua, 386.

nuda, 386.

sativa, 359, 386.

sterilis, 359, 387.

strigosa, 359, 387.

Aveneae, 428.

Awnless brome grass, 393.

Bacillus,

hemiphloiae, 451.

levaniformans, 450.

mesentericus, 449.

radicicola, 450.

subtilis, 453.

vulgatus, 450, 454.

Bacteria and enzymes, Synthesis of polysaccharides by, 449.

Bacterium,

acaciae, 450.

atherstonei, 450.

eucalypti, 451.

pararabium, 450.

sacchari, 450.

xylinum, 450.

Baking methods,

Basic, 546.

Bromate, 546.

Bromate-malt-phosphate, 547.

Malt-phosphate, 546.

Baking score, 546.

and fermentation time, Relation between, 552.

Banner oats, 359, 386.

Barks barley, 359, 387.

Barley,

Barks, 359.

Canadian Thorpe, 359, 387.

Hannchen, 387.

O.A.C. No. 21, 387.

Basic method of baking, 546.

Beckmannia erucaeformis, 393.

Birch, Penetration of water into seasoned and floated, 89.

Seasoning and end drying of, 82.

Blood, Determination of cholesterol in, (Allardye), 115.

from pathological animals, Analysis of, 123.

from red water cattle, Analysis of, 126.

Normal constituents of,

Cattle, 122, 126.

Human, 122.

Normals for cattle, Some pathological values, (Allardye, Fleming, Fowler and Clark), 120.

Blood cells, Comparative areas of red, 326.

Blue grama grass, 393.

Bluejoint grass, 393.

Bolinopsis infundibulum, 105.

Bomb calorimeter, Oxygen, 464.

Bordered pits, 141, 162.

Bound water, and gold number, Numerical relation between, 404.

as a measure of hydrophylic colloids, 345.

Comparison of sucrose and dextrose in determination of, 346.

content, Effect of storing leaf tissue on osmotic pressure and, 363.

of egg white and egg white solutions, 354.

of gum arabic solutions, 347.

of Marquis flour suspensions, Effect of hydrogen ion concentration on, 563.

values, Effect of sucrose on, 349.

Bound water of wheat flour suspensions, (Newton and Cook), 560.

Effect of natural electrolytes on, 562.

Effect of hydrogen ion concentration on, 562.

Effect of sucrose concentration on, 564.

Effect of time on, 570.

Effect of flour concentration on, 571.

Bouteloua gracilis, 393.

Bread,

Crumb character, 545.

Crust character, 545.

Bread baking methods,

Basic, 546.

Bromate, 546.

Bromate-malt-phosphate, 547.

Malt-phosphate, 546.

Bread manufacture, A study of the relative value of honey and sucrose in, (Geddes and Winkler), 543.

Bromate method of baking, 546.

Bromate-malt-phosphate method of baking, 547.

Bromus inermis, 393.

α -Butylene, 526.

β -Butylene, 526.

γ -Butylene, 526.

Butylenes, Reaction between hydrogen chloride and the,

in the gaseous state, 532.

in the liquid state, 527.

Cactus segments, Hydration curves of, 421.

Rate of water loss from, 417.

Caesium wheat, 391.

Calamagrostis canadensis, 393.

rubescens, 397.

Calamovilfa longifolia, 393.

Calcium in blood of normal cattle, 121.

Calorimeter, A new adiabatic, 70.

Description of, 71.

Notes on a vacuum cup, 469.

Operation of adiabatic, 74.

Oxygen bomb, 464, 466.

Canadian Thorpe barley, 359, 387.

Carbohydrates, Effect of *B. mesentericus* and *B. subtilis* on,
fructose, 453.
glucose, 453.
lactose, 453.
maltose, 453.
melezitose, 453.
raffinose, 453.
sucrose, 453.
xylose, 453.

Carbohydrates by *B. mesentericus* and *B. subtilis*, Gum production from various, 459.

Carbohydrates and polysaccharides,
Studies on reactions relating to,
XXXII. Constitution of sedosan (anhydro-sedoheptose), 306.
XXXIII. Synthesis of polysaccharides by bacteria and enzymes, 449.

Carbon and hydrogen, Determination of, (Stansfield and Sutherland), 318.

Carbon dioxide and ammonia, Reaction between,
Inhibition of reaction in gaseous state, 541.
Reaction in liquid state, 541.

Carbon dioxide in trees, 81.
in natural waters, 82.

Carbon monoxide, Action of high speed electrons on, 241.

Carbon suboxide by action of cathode rays on carbon monoxide, Formation of, 247.

Carex
filifolia, 395.
lacustris, 397.

Casein, Iodized, 128.

Catalysts,
Ferric acid, 220.
Ferric sulphate, 214.
Liquid phase, 538, 540.

Catalytic influence of liquid condition, 538, 540.

Cathode rays, Action on gases and gas mixtures of, 241.

Cattle, Blood normals for, (Allardyce, Fleming, Fowler and Clark), 120.
Goitre in, 128.

Normal and pathological constituents of blood of,
amino acid nitrogen, 121, 123.
calcium, 121, 123.
chlorides, 121, 123.
cholesterol, 121, 123.
creatinine, 121, 123.
creatinine, 121, 123.
inorganic phosphates, 121, 123.
non-protein nitrogen, 121, 123.
sugar, 121, 123.
urea-nitrogen, 121, 123.

Red water in, 125, 126.
Tuberculosis in, 123.

Cell colloids, Imbibitional properties of, 342.
sap in plants, Osmotic pressure of, 341.

Cell and projection microscope, Photoelectric, 322.

Cells, Comparative areas of red blood, 326.

Cells, General aging equation for, 487.
Notes on standard Weston, 485.
Preliminary determination of aging equation for, 481.

Channels, The design of corners in fluid, (Klein, Tupper and Green), 272.

Chinese hullless oats, 386.

Chloramine-T on honey fermentation, Effect of, 97, 98, 99, 101.

Chlorideae, 428.

Chlorides in blood of normal cattle, 121

Cholesterol,
content of blood in cattle, Effect of diet on, 123.
in blood, Determination of, (Allardyce), 115.
of cattle, 121, 123.

Chromosomes,
Agropyron, 432.
Medicago, 27, 40.
Melilotus, 29, 40.
Trigonella, 29, 40.

Cicuta maculata, 397.

Classification of stallions, 329.

Classifications of,
Medicago,
De Candolle, 6.
Hegi, 9.
Taubert, 7.
Melilotus,
Taubert, 11.
Trigonella,
Taubert, 12.

Clostridium gelatigenosum, 450.

Coefficients of correlation between press-juice properties of wheats and grasses, 404.

Colletotrichum phomoides, Effect of radiant energy on growth and sporulation in, (Hutchinson and Ashton), 187.

yeast and paramoecium, Comparison of effects of monochromatic light on, 196.

Colloids, at various concentrations, Relative water binding capacity of, 349.
Bound water as a measure of hydrophilic, 345.

Imbibitional properties of cell, 342.
Specific conductivity and gold number of various, 353.

Common emmer wheat, 386.

- Conductivities** applied to the oxidation of tartaric acid by Fenton's reagent, The static method for, 217.
- Conductivity** and gold number of various colloidal substances, Specific, 353. of tartaric acid solutions, 219.
- Constitution of sedosan** (anhydro-sedoheptose), (Hibbert and Anderson), 306.
- Coral rock**, Analysis of, 128. to cattle, Effect of administration of, 128.
- Covillea tridentata**, 341.
- Creatine** in blood of normal cattle, 121.
- Creatinine** in blood of normal cattle, 121.
- Crepis**, 444.
- Crested wheat grass**, 393.
- Critical voltage** of a neon tube, 517.
- Crop plants**, Factors affecting drought resistance in, 344. Physico-chemical studies on the nature of drought resistance in, (Newton and Martin), 336. Properties of various, 386.
- Cultures** and spores, Irradiation of, 193.
- Cyto-taxonomic relations**, 14, 19.
- Cytological studies**, Agropyron, (Peto), 428. Medicago, Melilotus and Trigonella, (Fryer), 3.
- Dactylis glomerata**, 428.
- Detection of rock salt** by the methods of electrical surveying, (Alty and Alty), 521.
- Dextrin**, Effect of an atypical strain of *Aërobacter oxytocolum* on, 203.
- Dextrose** in determination of bound water. Comparison of sucrose and, 346.
- Dialyser sacs**, Apparatus for preparation of, 368. Effect of shape and size on efficiency of dialysis of plant juice, 369.
- Dialysis** at low temperatures, Apparatus for continuous, 371. of emmer and Marquis wheat juices, Comparison of, 372, 374. of plant juice and properties of dialysed fluids, 367, 370. on sodium chloride solution on properties of wheat-leaf press juice, Effect of, 373. Progressive changes in the properties of press juice during, 371. Purification of levan by electro-, 458.
- Diabasic acids**, The oxidation of some, (Hatcher and Mueller), 291.
- Diet** on cholesterol content of blood of cattle, Effect of, 123.
- Diffraction reflection and scattering of ultrasonic waves**. By double-vane torsion pendulum, 501. By single-vane torsion pendulum, 504. Their influence on torsion pendulum measurements of sound intensity, (Boyle and Lehmann), 491. Theoretical details of, 499.
- Diffusion**, in tracheids, Probable mechanism of, 168. of liquids in wood, Hypothesis concerning, 169.
- Dihydroxy maleic acid**, 214.
- Di-iodo tyrosine**, 128.
- 2:3-Dimethoxy-4-hydroxy-riboglutaric acid**, 310.
- Dimethoxy succinic acid**, 309.
- Di-potassium tartronate** with hydrogen peroxide, Oxidation of, 295.
- Di-sodium fumarate** with hydrogen peroxide, Oxidation of, 302.
- Di-sodium maleate** with hydrogen peroxide, Oxidation of, 300.
- Di-sodium malonate** with hydrogen peroxide, Oxidation of, 293.
- Di-sodium succinate** with hydrogen peroxide, Oxidation of, 296.
- Double-vane torsion pendulum**, Diffraction reflection and scattering of ultrasonic waves by, 501.
- Doughs**, Gas production in, 550. made with honey and sucrose, Rate of gas production and reducing-sugar content of, 547, 553.
- Drought resistance in crop plants**, 336, 385. Factors affecting, 344. Physico-chemical studies on the nature of, (Newton and Martin), 336. Properties of plant-tissue fluids in relation to, 385.
- Dulcite**, Effect of an atypical strain of *Aërobacter oxytocolum* on, 203.
- Dyestuffs**, Reduction of nitrated glycol-lignin and preparation of, 134. from nitrated-lignin, Preparation of, 138.
- Echinocactus**, 343.
- Effect of intensive drying on the velocity of chemical reactions**, (Coffin and Maass), 540.
- Egg white and egg-white solutions**, Bound water and other properties of, 354.
- Einkorn wheat**, 359, 386.
- Electrical surveying**, Detection of rock salt by the methods of, 521. Single electrode probe method of, 521.

- Electrodialysis**, Purification of levan by, 458.
- Electrolytes in high frequency fields**, The heating of, (McLennan and Burton), 224.
- Electromagnetic waves**, Physiological and biological effects of, 224.
- Electromotive force**, Construction and selection of a reference standard of, 474.
of standard acid Weston cells, 486.
The maintenance of a standard of, (Shaw and Reilley), 473.
- Electron emission** of a triode oscillator, 512.
- Electron gun**, 175.
- Electrons**, Action on methane, oxygen and carbon monoxide of high speed, 241.
Action on mixtures of carbon monoxide and carbon monoxide-oxygen mixtures of high speed, 246.
Analyser for velocity analysis of beams of, 176.
Angular distribution of elastically scattered, 183.
Angular distribution of inelastically scattered, 184.
Energy of, 177, 178, 179, 180, 182.
in mercury vapor, Energy losses and scattering of, (Rose), 174.
- Emmer leaves**, Properties of dialysed press juice of, 380.
- Energy losses**, and scattering of electrons in mercury vapor, (Rose), 174, 179.
above ionization, 181.
in mercury-helium mixtures, 182.
- Energy of electrons**, 177, 178, 179, 180, 182.
- Energy surveys of ultrasonic beams**, 497.
- Enzymes**, Synthesis of polysaccharides by bacteria and, 449.
- Epimerisation** of trimethyl δ -arabonolactone, 316.
- Equine spermatozoa**, A study of the head length variability of, (Savage, Williams and Fowler), 327.
- Escherichia-aërobacter** group, 200.
- Euchlaena perennis**, 444.
- Factors influencing the output of a triode oscillator**, (Field), 510.
- Feed flavor or stable odor in milk** caused by an atypical strain of *Aërobacter oxylocum*, (Sadler and Irwin), 200.
- Fenton's reaction**, The influence of hydrogen ions on, (Hatcher and Sturrock), 214.
- Fermentation**, Effect of preservatives on honey,
"B-K" (sodium hypochlorite), 97, 99, 101.
Hexyl resorcinol, 97, 98, 99, 102.
Hydrogen peroxide, 97, 98, 99, 102.
"Santomine" (chloramine-T), 97, 98, 99, 101.
Sodium benzoate, 97, 98, 99.
Sodium bisulphite, 97, 98, 99, 100.
Sodium borate, 97, 98, 99.
Sodium salicylate, 97, 99, 100.
Sodium sulphite, 97, 99.
- Fermentation**, by sugar-tolerant yeasts from honey, The effect of preservatives on, (Lochhead and Farrell), 95.
in logs, 83.
of carbohydrates, 202.
of honey by sugar-tolerant yeasts, 51.
time, Relation between baking score and, 552.
tolerance, 543.
- Festuceae**, 428.
- Fillets**, Distribution of stress in parallel welding, (MacKay and Bain), 260.
Theory of distribution of stress in, 260.
- Flour**,
Suspensions,
Effect of flour concentration on hydration of acidulated, 571.
Effect of hydrogen ion concentration on, 563.
Effect of time on hydration of acidulated, 569.
- Flours**,
Kubanka, 568.
Little Club, 568.
Marquis, 563.
- Flow of liquids**, Discussion of, 163.
in a tube with perforated diaphragms, 161, 163.
in fibre, Conditions for steady, 161.
in fibre, Hydraulic theory applied to, 159.
in small short tubes, 167.
in small tubes, Viscous, 160.
in tracheids, Analytical discussion of the, 166.
through wood, 162.
Method of investigating, 142.
- Fluid channels**, The design of corners in, (Klein, Tupper and Green), 272.
- Fluminea festucacea**, 393.
- Freezing-point curves**,
 α -butylene-hydrogen chloride, 531.
 β -butylene-hydrogen chloride, 531.
- Freezing-point depression** and apparent hydration of sucrose, 566.
- Frost resistance and leaf fall**, Properties of leaf-tissue fluids in relation to, 411.
- Fumaric acid**, Oxidation with hydrogen peroxide, 301.

- Fungi**, Effects of ultra-violet radiation upon, 187.
- Furanose ring structure**, 309.
- Fusarium**, Irradiation of, 188.
- Galactose**, Effect of an atypical strain of *Aërobacter oxytocolum* on, 203.
- Galium trifidum**, 397.
- Gammarus locusta**, 105.
- Gas and gas mixtures**, Action of cathode rays on, 241.
- Gas production and reducing sugar content** of doughs made with honey and sucrose, Rate of, 547, 553.

Spirodela polyrhiza, 397.

Spores,

Comparative areas of red rust, 324.

for varying periods of time. Comparison of the effects of irradiation of cultures and of, 193.

Sporulation in *Colletotrichum phomoides*, The effect of radiant energy on growth and, 187.

Spruce,

Penetration of water into seasoned and floated, 86, 90, 91.

Rates of flow of water through jack pine and seasoned, 156.

Seasoning and end drying of, 82.
wood, Structure of, 141.

Spruce meal with various solvents, Extraction of, 68.

Stallions, Classification of, 329.

Standard cells,

Electromotive force, 486.

Establishment of initial reference mean, 479.

General aging equation, 487.

Notes and relations, 485.

Recapture of initial reference mean, 479.

Starch, Hydration of, 573.

Stipa

comata, 393.

viridula, 395.

Stress in parallel welding fillets, Distribution of, (MacKay and Bain), 260.

Subtilis mesentericus, 449.

Succinic acid, Oxidation with

hydrogen peroxide, 295.

potassium permanganate, 295.

Sucrose,

and dextrose in determination of bound-water, Comparison of, 346.

at different molar concentrations. Freezing point and apparent hydration of, 566.

by yeast, Rate of inversion of, 555.

concentration on bound-water values, Effect of, 349.

Hydrolytic action of plant juice on, 360.

in bread manufacture, A study of the relative value of honey and, 543.

Preparation of levan from, 453, 456.

Rate of gas production and reducing-sugar content of doughs made with honey and, 547.

Sugar,

in blood of cattle, 121.

in high frequency fields, Heating curve for solution of, 226.

levels in bread baking, 546.

- Sugar-tolerant yeasts**, 51.
from honey, Effect of preservatives on fermentation by, 95.
- Sulphur dioxide**,
Effect of high frequency fields on solution of, 231.
into wood, Penetration of, 149.
- Sunflower**,
Russian giant, 388.
- Sunlight on certain aquatic organisms**,
Effect of ultra-violet component of, (Klugh), 104.
- Surface water**, Analysis of, 127.
- Suspensions**,
Bound water and hydration of wheat starch, 573.
Bound water of wheat-flour, 560.
Effect of concentration on hydration of acidulated flour, 571.
Effect of hydrogen ion concentration on hydration of acidulated flour, 562.
Effect of time on hydration of acidulated flour, 569.
- Symphoricarpos racemosus**, 395.
- Synthesis of polysaccharides by bacteria and enzymes**, (Harrison, Tarr and Hibbert), 449.
- Tall manna grass**, 393.
- Talomucic acid**,
2:3:4-Trimethoxy-5-hydroxy-*l*-, 309.
- Tartronic acid**, Oxidation with hydrogen peroxide, 294.
potassium permanganate, 293.
- Tartaric acid**, Static method for conductivities applied to the oxidation of, 217.
solutions, Conductivity of, 219.
with hydrogen peroxide, Oxidation of, 298.
- Tautomerism** of dihydroxy maleic acid,
Evidence for, 221.
- Taxonomy** of
Medicago and related genera, 4.
M. falcata, 9.
M. sativa, 9.
- Tertiary butyl chloride**, 528.
- 1:3:4:5-Tetramethyl sedosan**, 309.
- Tetramethyl sedosan**,
Esterification of the oxidation product of, 314.
Oxidation of, 314.
Preparation of, 313.
- Thermometer corrections**, Beckmann, 468, 470.
- Thyroxin**, 128.
- Timothy**, Rate of water loss from leaves of, 423.
- Timothy grass**, 359, 387.
- Torsion-pendulum measurements** of sound intensity, Influence of ultrasonic waves on, 491.
- Torula**, 56, 61.
mellis, 51.
- Tracheids**, 141, 162.
Mechanism of flow in, 159.
Analytical discussion of the flow of liquids in, 166.
Probable mechanism of diffusion in, 168.
- Transpiration**, Plant structure and development in relation to absorption and, 338.
- Trees**, Gas pressure in, 80.
- Trehalose**, Effect of an atypical strain of *Aërobacter oxytocolum* on, 203.
- Trifolieae**, 4.
- Trifoliinea**, 4.
- Trifolium**, 4.
- Trigonella**,
Cytological studies, 3.
Geographical distribution, 13.
Chromosomes, 40.
General characters, 6.
- Trigonella**, 37.
Eutrigonella, 37.
Capitatae, 37.
T. coerulea, 37.
Gladiatae, 37.
T. foenum graecum, 37.
Pocockia, 37.
Samaroideae, 37.
T. cretica.
- Trimethoxy araboglutaric-dimethylamide**,
Fractionation of, 315.
Preparation of, 315.
- Trimethyl δ -arabonolactone**,
Epimerisation of, 316.
-methylamide, 312.
- Trimethoxy glutaric acid**, 312.
- 2:3:4-Trimethoxy-5-hydroxy-*d*-allomucic acid**, 309.
- 2:3:5-Trimethoxy-4-hydroxy-riboglutaric acid**, 310.
- 2:3:5-Trimethoxy-4-hydroxy-*l*-talomucic acid**, 311.
- 2:3:4-Trimethoxy-5-hydroxy-*l*-talomucic acid**, 309.
- Trimethoxy riboglutaric acid**, 309.

Triode oscillator,
 Effect of combined A.C. and D.C. plate supply on a short wave, (Field), 287.
 Influence of certain factors on the output of a, 510.
 Radiated energy from a, 511.
 Variation in radiation of a, 511.
 Electron emission of a, 512.

Triticum aegilopoides, 445.
 compactum, 386.
 dicoccoides, 386, 442.
 durum, 359, 386.
 monococcum, 359, 386, 445.
 polonicum, 386.
 spelta, 386, 445.
 turgidum, 386.
 vulgare, 359, 386, 442.

Trityl derivative of sedosan, Preparation of, 316.

Tunnel, Characteristics of modified corners in a wind, 272.

Ultrasonic beams, Energy surveys of, 497.

Ultrasonic waves, Diffractive reflection and scattering of, 491.

Ultra-violet component of sunlight on certain aquatic organisms, Effect of, (Klugh), 104.

Ultra-violet radiation on fungi, Effects of, 187.

Umbra, 254.

Urea-nitrogen in blood of cattle, 121, 123.

Vacuum cup calorimeter, Notes on, 469.

Vanes,
 for tests in a wind tunnel, 274.
 Pressure distribution on surface of, 283.
 Smoke tests for investigation of flow conditions on, 284.
 tested for flow conditions at corners, Types of, 274.

Velocity of chemical reactions, Molecular attractive forces and, 526.

Velocity of gaseous reactions, Note on the effect of intensive drying on the, 540.

Veronica incana, 339.

Viscosity of proteins, 575.
 Gliadin, 575.
 Glutenin, 575.

Voltage nodes with neon tubes, Indication of, 516.

Water,
 Analysis of surface and Artesian well, 127.
 loss from cactus segments, Rate of, 417.
 loss from leaves of timothy and western rye grass, 423.
 of plants, Bound, 345.

Water-binding capacity of different colloids at various concentrations, Relative, 349.

Welding fillets, Distribution of stress in parallel, (Mackay and Bain), 260.

Western rye grass, 359, 387.
 Rate of water loss from leaves of, 423.

Western spear grass, 393.

Western wheat grass, 393.

Weston cells, Notes on standard, 485.
 The electromotive force of standard acid, 486.

Wheat,
 Alaska, 386.
 Caesium, 365, 391.
 Common emmer, 386.
 Einkorn, 386.
 Hybrid 143, 386.
 Kubanka, 359, 386.
 Marquis, 359, 386.
 White Polish, 386.
 White spelt, 386.

Wheat and grass leaves, Structural features of, 424.

Wheat-flour suspensions, Bound water of, 560.

Wheat-leaf press juice during dialysis, Comparison of progressive changes in properties of common emmer and Marquis, 373.

Wheat leaves,
 Properties of, 386, 391, 398.
 Structural features of, 424.

Wheat-starch suspensions, Bound water and hydration of, 573.

White Polish wheat, 386.

White spelt wheat, 386.

Wild oats, 386.

Wood,
 Path of liquid penetration in jack pine, 140.
 Penetration into,
 Air into jack pine, 145.
 Metals,
 Fusible alloy, 145.
 Mercury, 145.
 Solutions,
 Pulp mill liquor, 150, 155.
 Sodium hydroxide, 112, 154, 159.
 Sulphur dioxide, 149.
 Water,
 Birch, 89.
 Jack pine, 83, 146, 149.
 Poplar, 87.
 Spruce, 86, 90, 91, 156.
 Structure of, 140.

Wood blocks,

Mechanism of the absorption of water by,
(Scarth), 107.

Xylose, Effect of an atypical strain of *Aërobacter oxytocum* on, 203.

Yeast, and paramoecium, Comparison of the effects of monochromatic light on *Colletotrichum phomoides*, 196.
Rate of inversion of sucrose by, 555.

Yeast-honey and yeast-sucrose suspensions, Relative rates of gas production in, 554.

Yeast-sucrose suspensions, Relative rates of gas production in yeast-honey and, 554.

Yeast types in soil, 54, 55, 56.

Yeasts from honey,
Effect of preservatives on fermentation by sugar-tolerant, (Lochhead and Farrell), 95.
Soil as a source of infection of honey by sugar-tolerant, 51.

Zea mays, 359, 388, 444.

Zygosaccharomyces, 56.
nussbaumeri, var., 59.

ERRATA

VOLUME II

In legend to Plate II, opposite page 184, for "Fig. 3" read "Fig. 5", and for "Fig. 5" read "Fig. 3".

Page 191, line 4, for "(9, pp. 74-75)" read "(10, pp. 74-75)".

Page 192, line 23, for "elongate-globulate" read "elongate-lobulate".

Page 194, line 5, for "Louisiana (9)" read "Louisiana (8)".

VOLUME III

Page 99, Table I, column 3, opposite "sodium bisulphite", for "0.1%" read "0.01%".

Pages 266-271. The cuts over captions 6 and 7 should appear over captions 11 and 10, respectively. Cuts over captions 10 and 11 should appear over captions 7 and 6, respectively. Cuts over 8 and 9 are transposed.

Page 416, line 16, for "57%" read "357%".
